KeepXtra

INVESTOR PITCH DECK

Investing in Africa's Future Food Infrastructure

Cold storage, logistics, and technology infrastructure reducing post-harvest food loss across Africa's fresh produce supply chain.

Accra, Ghana · info@keepxtra.com

AT A GLANCE

Reducing food waste, at scale.

KeepXtra connects farmers and traders to professional cold storage, quality assurance, and last-mile delivery — so fresh produce reaches restaurants, retailers, and households before it ever has the chance to spoil.

HEADQUARTERS	SECTOR	STAGE	TEAM
Accra, Ghana	**Fresh Produce Logistics & Cold Chain Infrastructure**	**Seed**	**4 leaders, growing**

Traction to date

2,500+
Tonnes of food saved from waste

1,200+
Farmers & traders supported

350+
Businesses served

40,000+
Deliveries completed

THE PROBLEM

A market held back by broken infrastructure.

Poor storage and fragmented distribution mean fresh produce rarely makes it from farm to buyer intact.

Food Waste **40%**

Of harvested produce is lost before it ever reaches a buyer.

Poor Logistics **35%**

Of supply chain cost is lost to fragmented, informal logistics.

Farmer Income **30%**

Of potential farmer income is lost to spoilage and inefficiency.

Supply Shortages **60%**

Of buyers report frequent, unpredictable supply shortages.

OUR SOLUTION

The infrastructure layer that was missing.

1

Technology

Real-time visibility into inventory, orders, and routing.

2

Storage

Temperature-controlled facilities that extend shelf life.

3

Distribution

A logistics network built for perishable goods, at scale.

4

Supply Chain

One connected process from farm to storage to buyer.

5

Market Access

Direct connections between producers and buyers.

HOW WE WORK

One connected process, farm to table.

Produce moves from partner farms into cold storage within hours, is quality-checked and tracked in real time, then routed to buyers through our distribution network — cutting out the informal middle layers that cause the most loss.

MARKET OPPORTUNITY

A market growing faster than infrastructure can keep up.

ADDRESSABLE MARKET

$4B+

Annual value flowing through Africa's fresh produce supply chain today.

FOOD INDUSTRY GROWTH

+6%/yr

Projected annual growth in Africa's food & beverage sector.

URBAN DEMAND

68%

Share of Africa's population projected to live in cities by 2035.

POPULATION GROWTH

~2x by 2050

Africa's population is projected to nearly double, driving food demand.

BUSINESS MODEL

Five ways we generate revenue.

1

Storage Fees

Recurring fees for cold storage capacity used by farmers, traders, and buyers.

2

Delivery Fees

Per-delivery and route-based fees for last-mile and bulk distribution.

3

Subscription Plans

Monthly plans giving businesses guaranteed storage and delivery capacity.

4

Enterprise Partnerships

Custom supply agreements with hotels, retailers, and institutions.

5

Marketplace Revenue

A share of transactions made through KeepXtra's marketplace.

TRACTION & IMPACT

Progress you can measure.

2,500+
Tonnes of food saved from waste

1,200+
Farmers & traders supported

350+
Businesses served

40,000+
Deliveries completed

Figures reflect internal operating data and are updated regularly as the network grows.

WHY NOW

Three tailwinds converging at once.

Urbanization

Africa's cities are growing faster than the food logistics needed to supply them, widening the gap infrastructure must fill.

Mobile & Digital Adoption

Mobile money and smartphone penetration now make real-time logistics coordination possible at low cost.

Climate & Food Security

Reducing post-harvest loss is increasingly treated as a climate and food-security priority, not just an efficiency gain.

GROWTH STRATEGY

How we scale, deliberately.

1

Expand City by City

Deepen density before expanding, so service quality never dilutes.

2

Build Logistics Hubs

Regional hubs that shorten collection and delivery routes.

3

Increase Cold Storage

Grow capacity ahead of demand to keep onboarding partners.

4

Develop Technology

Invest in the software layer that makes the network smarter.

ROADMAP

Where we’re headed, 2026–2029.

2026

Launch

First cold storage facility and delivery routes live.

2027

Regional Expansion

New storage hubs across neighboring cities.

2028

National Network

Connected storage & logistics network nationwide.

2029

West African Expansion

Entry into new West African markets.

KeepXtra

IMPACT & ESG

Returns and impact, built together.

1

ESG

Governance and reporting built in from day one.

2

Food Security

Less waste means more food reaching the people who need it.

3

Farmer Empowerment

Fair pricing and faster payment cycles for our farmers.

4

Environmental Sustainability

Reducing spoilage cuts emissions embedded in wasted food.

LEADERSHIP

The team building KeepXtra.
